

Infusion Pumps

Infusion Pump Training

The Health Centre uses Alaris IV infusion pumps. Student who is interested to learn more can access e-Learning module via <https://learning.unityhealth.to/course/view.php?id=1173>

PCAs/CADDs/Epidural Infusions

For students and Clinical Instructors, the care of PCA, CADD and epidural infusions is restricted to patient monitoring only, which is in accordance with the SJHC's Clinical Scope of Practice for Nursing Students policy.

NOTE: If you notice that the PCA pump door has been tampered with or an alarm on the screen is reading ALARM CODE 630, please notify a nurse as soon as possible.
